WORK EXPERIENCE

RetailMeNot, Austin TX

1. *Software Engineer, Mar 2018 - May 2019*
   - Evaluated peer code to ensure function, design, and standardization.
   - Maintained understanding of current web technologies or programming practices through continuing education.
   - Wrote supporting code for web applications, including frontend and backend technologies.
   - Assisted in managing data in database, performing queries to update, and regulate database.
   - Recommended and implemented performance improvements (speed improvements) through caching, code improvements and image optimizations.
   - Performed or directed website updates.
   - Assisted in migration of frontend code base from Angular to React JS/Redux
   - Created new pages as directed per product & design.

LowestMed, Draper UT

2. *Software Engineer/Full Stack Engineer, July 2016 - Mar 2018*
   - As one of two developers, I created content, and functionality as directed from product, reviewed, tested, and managed releases.
   - Perform work, and improvements on both frontend, and backend technologies, working with multiple affiliated and their API's
   - Assisted in managing and updating database.
   - Built autocorrecting search results for users to improve search dramatically
   - Helped as one of five initial employees grow transactions in company from 7,000 transactions monthly to over 50,000, and helped company arrive to be sold in March of 2018 to RetailMeNot
